CEO ONBOARDING · 60 MINUTES · HANDS-ON

Command of the *Hub*

One platform. Two businesses. Total visibility.

PIXIE GIRL GLOBAL • FAITLYN HAIR

WHAT YOU ARE LOGGING INTO

One system runs *both businesses*

ERP + CRM + E-commerce in one place — sales, stock, imports, invoicing, accounting, HR, marketing and an AI operator. **37 modules, one login.**

PXG

Pixie Girl Global

Hair · retail · stylist partner network

THE HUB · SHARED CORE

Identity · AI · Audit · Documents

Each business keeps its own customers, stock & books — separated by design.

FLH

Faitlyn Hair

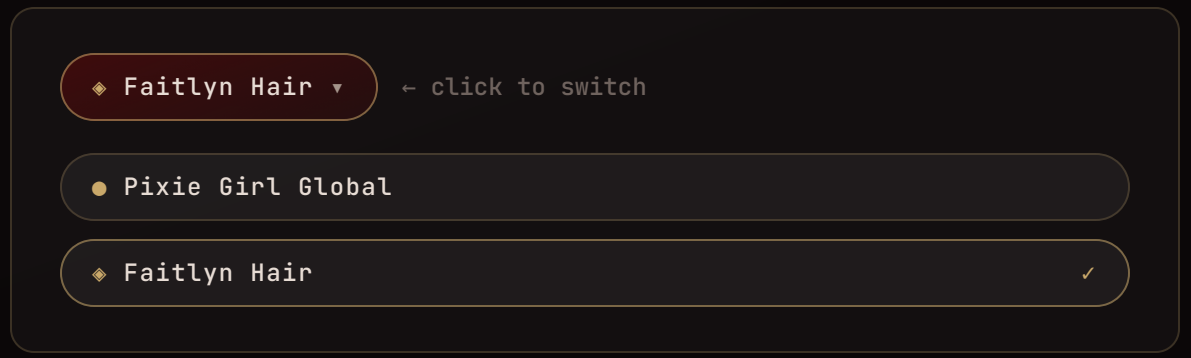

Hair · in-house styling studio

Your CEO login sees everything — no permission wall. Every naira, order and message, in one place.

TOP-LEFT, ALWAYS

Know which business *you're in*

The business chip at the top-left is a switch. Flip it and **every list, KPI and total on screen re-loads** for that business. Same screens, different money.

◆ One rule to remember

If a number looks wrong, check the switcher first. You may simply be reading the **other** business. Switching is safe — it changes nothing, it just re-scopes the view.

▶ TRY IT NOW

~3 min

1. Find the **business chip**, top-left of any screen.
2. Switch **Pixie Girl Global → Faitlyn Hair**.
3. Watch the dashboard **totals change**. Switch back.

NEVER GO HUNTING

Get anywhere in *two seconds*

The left sidebar groups every module. But the fastest route is the command palette — one box that finds records, jumps to any page *or tab*, and runs commands.

▸ Run ▸ Operate ▸ Finance ▸ People ▸ Grow ▸ System

⌘ + K (Ctrl-K on Windows)

Type a module (“invoicing”), a tab (“chart of accounts”), a record, or a command (“new order”). The floating Praxis button is on every screen too.

▶ TRY IT NOW

~5 min

1. Press **⌘K** (or Ctrl-K).
2. Type **“invoicing”** → Enter.
3. ⌘K again → **“cash”** → open Cash Requests.

HOME & DASHBOARD

Your morning in *one screen*

Home is your **Command Center** — a role KPI strip, quick actions, Praxis insights and your app grid. `/dashboard` is the deeper numbers view.

REVENUE · TODAY	ORDERS · TODAY	CASH POSITION	AWAITING YOU
₦ ▒▒▒▒	▒▒	₦ ▒▒▒▒	▒
▲ vs. yesterday	live count	across accounts	approvals pending

Illustrative — your live figures appear here, and re-scope the moment you switch business.

▶ TRY IT NOW

~5 min

1. Open **Dashboard** from the sidebar.
2. Read the **four headline KPIs** aloud.
3. **Switch business** and compare the two.

ASK, DON'T HUNT

Praxis, your *AI chief of staff*

✦ How it behaves

Reads freely · **writes** only with your sign-off · **acts** only with your permissions. Ask in plain English; get an answer and a link.

Where to find it

The floating ✦ button on every screen, the full workspace at `/praxis`, and proactive alerts under `/insights`.

Treat it like a sharp analyst who never sleeps and already has every number.

▶ ASK PRAXIS

~8 min

1. "**What needs my approval today?**"
2. "**Top 5 customers this month** for Faitlyn Hair."
3. "**How is cash** across both businesses?"

THE BUCK STOPS HERE

Approvals come *to you*

Expenses, cash requests, purchase orders and price/discount changes route through the **workflow engine**.
You see the full approval chain before you sign — and every decision is logged.

RAISED
Request
Staff submit an expense, PO or discount

→

ROUTED
Chain
Rules pick the approvers & thresholds

→

YOU
Decide
Approve, or return with a note

→

LOGGED
Audit
Recorded, actioned, notified

▶ TRY IT NOW
~7 min

1. Open **Org & Workflow** `/org-workflow` → Approvals.
2. Open a pending item; **read the chain**.
3. **Approve**, or return with a note.

NAIRA, ALWAYS

Where the *money* lives

▤ Invoicing

Live accounts receivable — who owes what, right now. `/invoicing`

▦ Accounting

The books — ledgers, chart of accounts, reports. `/accounting`

◇ Expenses & Cash

Claims, advances and disbursements. `/expenses`

Every figure is in Naira. History is never re-computed with today's FX — what happened, stays as it happened.

▶ TRY IT NOW

~7 min

1. **Invoicing** → read outstanding **AR**.
2. **Switch business**; read the other AR.
3. Ask Praxis: "**cash position, both businesses**."

YOU HOLD THE KEYS

People, access & *control*

◈ Org & Workflow

Structure, roles and approval rules. Decide what each role can see and do. `/org-workflow`

▣ IAM & Security

Users, sessions and the full audit trail — every action, attributable. `/iam-security`

◧ HR & Payroll

People, attendance, pay runs and payslips. `/hr` · `/payroll`

✦ AI Control

Govern what Praxis knows and may do; usage per business. `/ai-control`

Grant it, revoke it, and the system enforces it everywhere — UI and API alike.

▶ TRY IT NOW

~7 min

1. **IAM & Security** → **Users**; open one person.
2. See their **role & access**.
3. **Org & Workflow** → **Roles**; view a role's modules.

FROM TODAY

Your daily *10 minutes*

01
